## **Transformation in Families**

Transformations can be a big momentous occasion or many small daily steps. Our family came up with the words below describing what transformation meant to each of us. Most of these words speak to the transformations that occur in small incremental steps. And in fact, life is just a series of transformations from the newborn child, to the toddler, to the teenager, to the young adult, to the adult, to the elder in the community. Let us rejoice as we transform into each stage of life.
