

Growing by Percentages

1. Find your annual income in the left hand column; then move to the right, finding your monthly or weekly giving.
2. Compare the amount you are giving to the amount in the "Tithe" column.
If you are giving less than a tithe (10%), ask yourself if you can become a tither this year.
3. If you are not yet ready for tithing, determine what it would mean if you could step up your giving.
